WESTGATE

YOUR GATEWAY TO GREAT PRODUCTS

INTRODUCTION

Westgate Manufacturing, Inc., based in Southern California, is a pioneer and a leading manufacturer of LED lighting products in the North American market.

Westgate offers products in a wide range of lighting categories, designed by the most knowledgeable engineers in the lighting field and styled by reputable lighting designers.

By choosing a Westgate product you are assured to have selected the very latest in LED technology. With years of experience in the electrical and lighting manufacturing and wholesale business, our staff have a deep understanding of the competitive nature of job costing and bidding. We constantly monitor the market and update our products and prices to remain the most competitive.

Westgate's nationwide network of representative are trained and knowledgeable factory agents who are ready to provide product information, improvements, technologies, and update you on the latest pricing.

Westgate Manufacturing, Inc. was founded in 2008 in Los Angeles, California as a manufacturer of standard HID outdoor fixtures and electrical products.

We pride ourselves on being among the first companies in the U.S. to adjust our focus to LED lighting at the onset of the current lighting technology revolution.

Westgate is considered a veteran of the modern lighting technology. Westgate manufactures the lighting fixtures at state of the art factories with the most modern manufacturing facilities.

We hire talented engineers and drafters to design our lights around the leading LED chip products such as Cree®, Philips®, Nichia®, and Bridgelux®. Quality LED drivers and surge protectors such as Meanwell®, Invnetronics®, and Littlefuse® are installed in all fixtures. We are very particular to use the most precise casting machines for our fixture housings.

Westgate lighting products go through a rigorous testing process during development and each fixture is individually tested before it is packaged for shipment. Our products meet and/or exceed U.S. standards and are certified by UL, ETL, DLC, and Energy Star agencies.

Our extensive stock of thousands of models at our Los Angeles facility ensures same day shipping of most orders.

THE WESTGATE ADVANTAGE

WITH BI-LEVEL MICROWAVE MOTION SENSOR

Bi-Level Microwave Motion Sensor

1. Daylight sensor turns light on when ambient light falls below preset illumination level.
2. When movement is detected, light is switched on.
3. No motion detected, dims to preset level after hold time.
4. After dimmed stand-by period, if no movement is detected, fixture is switched off.

All above settings are adjustable by DIP switches on the sensor

LENS TYPES EXPLAINED

SELECTING THE BEST DISTRIBUTION TYPE FOR YOUR OUTDOOR PROJECT

“Distribution Type” defines how far forward of the luminaire (i.e., on the streetside) the effective output reaches.

Type 2 is still lineal but wider in the front to accommodate 4 lane roadways, or wider drive lanes.

Type 3 (commonly known as a “Bat-Wing”) is suitable for perimeters, often where other interior pole placements fill the site.

Type 4 (commonly known as a “Forward Throw” or Asymmetric) is best along perimeters where spill light is a concern or there are no place to add poles within a site.

Type 5 – is available in a round or square pattern. Best suited for interior areas within a site or on the median of 4-6 lane roadways.

RETROFIT TROFFER DOOR REPLACEMENT

TECHNICAL SPECIFICATIONS:

- See application below
- Input Voltage: 120~277VAC, 50/60Hz
- Housing: Steel base with white powder coating
- Steel Thickness: 24 Gauge
- Lens: Frosted diffuse PC lens
- CRI: >80
- Dimmable: 0~10V dimming
- IP rating: IP20 (Indoor)
- Operating Temperature: -4°F~131°F
- Life Span: 50,000 hours
- Retrofit baskets included

FEATURE:

- Replaces prismatic lens on standard fluorescent troffer fixtures to create a modern & efficient office environment

APPLICATIONS:

- Replaces door frame & lens of traditional fluorescent flat-lens troffer fixtures
- No need to remove old fixture; simply remove and discard the door frame of the existing fixture; place to adapter brackets (included) in the existing fixture; hinge this retrofit unit to the fixture; disconnect the balast; connect the wires to the retrofit unit and close

T8-EZ4

A/C Direct or Ballast Compatible
(Works with some magnetic T12 ballasts)

Works 4 ways:

1) With existing electronic ballast
AC100~347V

2) With existing magnetic ballast
AC100~347V

3) A/C direct one end
AC120~277V

4) A/C direct 2 ends
AC120~277V

TECHNICAL SPECIFICATIONS:

- :: T8 LED lamp, operates in the following manners:
 - 1 Existing electronic ballast.
 - 2 Ballast override AC direct, load and neutral on two sockets (Shunted), reverse polarity accepted.
 - 3 Ballast override AC direct, load and neutral on one socket (Non-Shunted), see label on lamp for the correct end to power.
- :: Lumens: 2050~2200LM (120LM/W)
- :: Voltage: 120V~277V AC
- :: Power Factor: 0.9 THD: <20%
- :: Base Type: G13
- :: IP Rating: IP20 (Indoor)
- :: Works A/C Direct one end or both ends
- :: Works with electronic and magnetic ballasts
- :: CRI 80
- :: Rated Life: 50,000 hrs.
- :: Ambient Operating Temperature: -13°F to 113°F
- :: Glass tube—better transparency and thermal conductivity than plastic
- :: Beam angle: 240°

APPLICATIONS:

- :: Avoid initial labor costs by replacing the fluorescent tube with this compatible tube. Once fluorescent ballast fails, there is no need to install a new ballast. This tube can simply work with direct A/C power.
- :: Ideal for offices, showrooms, refrigerators, cove lighting, etc.

T8-U2F

A/C Direct or Ballast Compatible LED U-Tube

TECHNICAL SPECIFICATIONS:

- :: U6 T8 LED lamp operates on line voltage without a ballast, sockets wired to line voltage, or with electronic ballast
- :: Voltage: 120~277V AC input
- :: Heat sink: 6063 extruded aluminum with heat dissipation ribs for superior thermal management
- :: Beam Spread: 120°
- :: Base: Fits standard T8 (G13) wired directly to line voltage (120 or 277V AC) or with existing electronic ballast
- :: Rated Life: 50,000 hrs.
- :: Ambient Operating Temperature: 14°F to 80°F
- :: Not dimmable (dimmable version available by special order)

APPLICATIONS:

- :: Ideal for offices, retail stores, showrooms and residential applications. Especially suited for areas where accessing the fixture is challenging.

Works 3 ways:

Dimmable A/C Direct (Ballast Override 4ft. & 8ft.)

(T8 4ft. wiring diagram only)

TECHNICAL SPECIFICATIONS:

- ⌚ T8 LED lamp operates on line voltage with existing electronic ballast or without a ballast; sockets wired to line voltage.
- ⌚ Voltage: 90~140V AC input (4 ft. tubes)
- ⌚ Rated for use in open fixtures only. Not for use in enclosed fixtures
- ⌚ UL-listed, DLC-rated except T8-8FT-40W-50K
- ⌚ Heat sink: 6063 extruded aluminum with heat dissipation ribs for superior thermal management
- ⌚ Beam Spread: 120°
- ⌚ Base: Fits standard T8 or T12 sockets (G13)
- ⌚ Rated Life: 50,000 hrs.
- ⌚ Ambient Operating Temperature: 14°F to 80°F
- ⌚ Not dimmable (dimmable version available by special order)
- ⌚ Requires no ballast. Existing ballast must be bypassed and sockets wired directly to line voltage.
- ⌚ Ideal for offices, retail stores, showrooms, and residential applications. Especially suited for areas where accessing the fixture is challenging.

UC-ADJ

24V

TECHNICAL SPECIFICATIONS:

- :: Requires electronic or hard wired magnetic drivers
- :: Ultra-low profile—only 1/4" deep in flat position
- :: Strip can be easily adjusted from 0 to 90°.
- :: Polycarbonate end caps with universal feed thru mono-pin receptacle
- :: Extruded aluminum housing with white powder coat finish
- :: Smooth clear acrylic lens (.125" thickness). Seamless light output
- :: Highly efficient SMD 3528 chip technology
- :: Integrated switch, push on—push off
- :: Mounting hardware and coupler included
- :: Working voltage: 24V DC—(driver required)
- :: Color temperatures: warm white (3000K), cool white (6000K)
- :: Suitable for interior applications only
- :: Ambient temperature rating: 4°F~104°F

DIRECTION ADJUSTMENT:

1. Adjust the illumination direction of the lamp for 0°, 45° or 90°.
2. The lamp can only be rotated 90° maximum.

APPLICATIONS:

- :: Very low profile, easy to install, cool to the touch
- :: High output with excellent color rendition and years of maintenance free operation
- :: Wide selection of mounting hardware, accessories and LED drivers

TECHNICAL SPECIFICATIONS:

- :: Material: black powder-coated steel enclosure
- :: Dimmable with most low-voltage magnetic dimmers (Dimmer minimum load must be met.)
- :: Confirms to UL standard 1310 class 2 wiring
- :: Primary and secondary auto-reset breaker
- :: Input leads 18 AWG
- :: Output leads 14 AWG
- :: Leads maximum operating temperature 105 centigrade
- :: Enclosure temperature does not exceed 65 at 45 ambient when fully-loaded.
- :: Wiring compartment has (2) 1/2" knockouts.

FEATURES:

- :: Compact design allows for installation in low profile applications.
- :: Ideal for hard wired applications or when full range dimming is required.
- :: Encapsulated with polyester resin for whisper-quiet operation.

Q&A

**Where can LED Ribbon Light be used?**

LED Ribbon is a thin, flexible product that is easy to install and can be used for many unique lighting applications, like under cabinet, retail display case, soffit, landscape, sign lighting, even outlining the architectural features of a building. The fifty thousand (50,000) hour life expectancy of the SMD LED chips offer many years of maintenance free operation with a low cost per foot installation.

**What is the difference between LED Rope light and LED Ribbon light?**

LED Ribbon has a low profile and uses SMD chips that are brighter and more efficient LEDs used in rope light. The LED Ribbon is flat and the SMD chip emits light in a more focused, Omni-directional manner over 180 degrees compared with Rope lights that emit light in a 360 degree pattern.

What are SMD5050 and SMD3528 chips? How do they compare with each other?

SMD chips have high brightness and low power consumption while minimizing their lumen depreciation due to the epoxy resin coating and integral thermal management. The numbers represent the dimensions of the chip, for example the SMD5050 chip is .50mm by .50mm square, uses .24 watts and is mounted on a ribbon that is 1/2" wide. The SMD3528 chip is .35mm by .28mm, consumes .08 watts and is mounted on a 7/16" wide ribbon. Both are available in warm white (3200K), Day light (5500K) and RGB. The letters SMD represent the words "Surface Mount Device". All 12 & 24 volt LED Ribbon products are powered using an LED driver (See page 5). The 120 volt ribbon uses a DC rectifier. The LED Ribbon with RGB chips requires the use of a controller.

**How many SMD chips per foot? How much power is needed?**

Westgate's LED ribbon contains 19 LED chips per foot and they are spaced approximately 7/16" on center. Each foot of SMD3528 tape light consumes 1.5 watts and each foot of SMD5050 tape light consumes 4.4 watts. An LED driver with 12 or 24V DC secondary is required for low-voltage ribbon.

Can LED ribbon lights be used outside?

Yes, if the ribbon has the proper IP (Ingress Protection) cover to protect it against dust and water. The IP54 and IP65 products work well in damp locations, for example under eaves. The IP68 rated product can be used for applications with full exposure to rain or submersed in a fountain on a GFCI protected circuit. The IP20 rated product is for interior "dry" applications only.

Westgate LED ribbon is offered with the following IP ratings

- IP20: Indoor use only
- IP54: Protected against dust and water splashes (limited ingress permitted)
- IP65: Protected against dust and mild water jet (limited ingress permitted)
- IP68: Dust tight and protected against immersion in water.

How often can the Ribbon Lights be cut?

Every 2 to 4 inches for low-voltage product and every 20" on 120-volt product. Cut only on the cut lines printed on the ribbon.

Would it be weatherproof once it is cut?

No, once the ribbon is cut it may not be in contact with moisture unless it's capped and sealed with silicone and cased in heat shrink.

You can cut at the designated marks. Just look for scissors!

IP54/IP65 can be cut with razor knife.

TERMS & CONDITIONS

[Effective October 1, 2017]

Return Policy

- a) Westgate Mfg is committed to providing 100% customer satisfaction. Returns are allowed for any reason on most items within 30 days of purchase with no restocking fees.
- b) Items must be returned in original packaging, including parts and manuals.
- c) All items must be returned in new condition, with an RGA form issued by Westgate
- d) Mfg. Due to the fluctuating price of copper, all purchases of wires and cable are final.
- e) Westgate Mfg strives to provide premium quality products that exceed UL standards and consumer expectations. All items are under the Westgate warranty. For the length of warranty refer to each item's catalog page.

Freight & Shipping Terms

- a) All shipments may be shipped to the distributor's stock, or any other location within the contiguous United States. There is no drop-ship charge.
- b) Freight will be prepaid on any order of any order \$1250.00 or more, delivered to one single location within the contiguous United States (excluding Alaska and Hawaii).
- c) Customers may use their own carrier for shipping.
- d) All items that are available in local stock and are ready to ship will ship the same day or will be ready for Will Call the same day. However, Westgate Mfg shall not be held liable for any delay in shipping or handling of goods.

Purchasing Terms and Prices

- a) There is no minimum purchase requirement on orders.
- b) Items may be ordered by package quantity or in smaller quantities at no additional charge.
- c) Prices are subject to change without notice.
- d) Prices in Pricebook are for reference only and do not indicate maximum prices.
- e) Westgate reserves the right to charge any price based on its sole judgement.
- f) All prices round up to the nearest cent; consequently actual invoice prices may vary slightly.
- g) 30-day credit terms are available to purchasers with approved credit. A 1.5% finance charge per month may be assessed to accounts with past due balances.
- h) Purchaser will be held responsible for any returned check fees or legal fees due to failure of payment.
- i) Westgate Mfg. reserves the right to refuse credit to anyone.

Product Guarantee

- a) Westgate brand products are warranted against defects in material and workmanship. In the event of any defects, Westgate Mfg promises only to repair or replace the defective products, free of charge. Westgate Mfg's liability is expressly limited to the cost of the initial product and any consequential damages arising out of the event of a defect are expressly excluded.
- b) Westgate Mfg. warrants all of its products against manufacturing defects for ONE FULL YEAR unless a higher warranty is indicated on the product; provided that the product has been used in accordance with installation standards and the National Electrical Code.

Defectives Policy

Inspect products upon receipt. Broken lenses and other visible defects must be reported within 7 days of receiving the shipment. Defective products during warranty period will be replaced with the same item. If an item has been discontinued a newer version with similar specs will be recommended.

- a) In such a case the customer will be invoiced for the difference between the cost of the new item and the last published price of the old one.
- b) If the customer does not accept the substitute, the credit amount will be based on the latest published price.

Product Changes

The specifications and designs of our products may change in accordance with new codes and standards at any time without notice.

All purchases from Westgate are under this and other terms and conditions instructed by Westgate.
